Advisory Action

1. The amendment filed on August 21, 2007 under 37 CFR 1.116 in reply to the final rejection has been considered but is not deemed to place the application in condition for allowance and will not be entered because: the proposed amendment raises new issues, such as curing the top coat layer at a temperature of 275°C or more, that would require further search and consideration since they were not searched and addressed in the Final Office Action mailed on 6/08/2007.

Response to Arguments

3. Applicant's arguments with respect to amended claims have been considered but are moot because they are directed to non-entered amendment.

As to Weber et al, Applicants argue that Weber et al. is concerned with producing nickel shell molds for doors, window sashes, furniture, cabinet tops, coffins and ornamental drawers (col. 3, lines 10-25) that have a textured surface of wood, leather, cloth and like materials. There is never mention of making a replaceable fuser roller member.

The Examiner respectfully disagrees with this argument. It has been held that a prior art reference must either be in the field of applicant's endeavor or, if not, then be reasonably pertinent to the particular problem with which the applicant was concerned, in order to be relied upon as a basis for rejection of the claimed invention. See *In re Oetiker*, 977 F.2d 1443, 24 USPQ2d 1443 (Fed. Cir. 1992). In this case, Weber et al is reasonably pertinent to the particular problem with which the applicant was concerned. Note that Weber et al is a *secondary* reference which is relied upon to show that mandrel and shell should have similar coefficients of expansion to avoid warping.

As to improper hindsight reasoning, it must be recognized that any judgment on obviousness is in a sense necessarily a reconstruction based upon hindsight reasoning. But so long as it takes into account only knowledge which was within the level of ordinary skill at the time the claimed invention was made, and does not include knowledge gleaned only from the applicant's disclosure, such a reconstruction is proper. See *In re McLaughlin*, 443 F.2d 1392, 170 USPQ 209 (CCPA 1971).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elena Tsoy whose telephone number is 571-272-1429. The examiner can normally be reached on Monday-Thursday, 9:00AM - 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Timothy Meeks can be reached on 571-272-1423. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
